Elektrotehnički fakultet
Univerzitet u Banjoj Luci

Zašto mi je ovo bitno?

Preporuka Komisije (EU) 2018/790 o pristupu i čuvanju naučnih informacija

- (...) primarni podaci nastali tokom istraživanja finansiranih javnim sredstvima treba da postanu i ostanu vidljivi, dostupni, interoperabilni i upotrebljivi i u druge svrhe (načela FAIR – findable, accessible, interoperable, reusable) unutar sigurnog i pouzdanog okruženja, posredstvom digitalne infrastrukture (uključujući i infrastrukturu Evropskog oblaka za otvorenu nauku – EOSC) (...)

❑ Reakcije na Platformu za otvorenu nauku MPNTR Republike Srbije:

- ❑ Kako može da se traži da omogućim uvid u svoje neobjavljene podatke, kada postoji opasnost da ih neko drugi iskoristi, objavi itd?
- ❑ Na osnovu čega ću pisati rad i ko će mi takav rad prihvati za objavljivanje?
- ❑ Kako smemo da objavimo podatke, kada tu ima i ličnih informacija o ispitanicima?
- ❑ U mojoj oblasti istraživanja ne postoje podaci.
- ❑ ...

Da li koristite podatke u istraživanju?

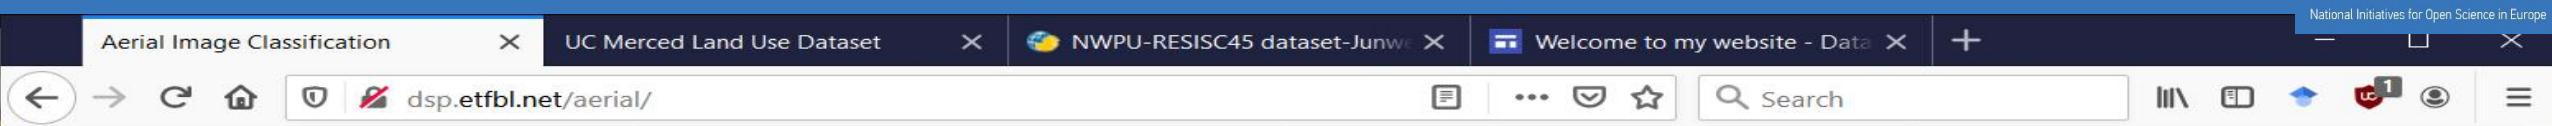

Kako pronađite podatke?

Analiza aero-snimaka

Aerial Image Classification

The amount of remote sensed imagery that has become available by far surpasses the possibility of manual analysis. One of the most important tasks in the analysis of remote sensed images is land use classification. This task can be recast as semantic classification of remote sensed images.

Database of RGB+NIR aerial images

[Database](#) of aerial images with both RGB and NIR versions.

Database of RGB aerial images

The database consists of 606 RGB aerial images of size 128*128 pixels. They have been obtained by partitioning a larger (4500*6000 pixels) ortophoto image of the part of Banja Luka, Bosnia and Herzegovina. In this image there is a variety of structures, both man-made, such as buildings, factories, and warehouses, as well as natural, such as fields, trees and rivers.

We manually classified all images into 6 categories. Examples of images from each category are shown in the figure, from left to right: houses, cemetery, industry, field, river, and trees.

NWPU-RESISC45 dataset

NWPU-RESISC45 dataset is a publicly available benchmark for REmote Sensing Image Scene Classification (RESISC), created by Northwestern Polytechnical University (NWPU). This dataset contains 31,500 images, covering 45 scene classes with 700 images in each class. These 45 scene classes include airplane, airport, baseball diamond, basketball court, beach, bridge, chaparral, church, circular farmland, cloud, commercial area, dense residential, desert, forest, freeway, golf course, ground track field, harbor, industrial area, intersection, island, lake, meadow, medium residential, mobile home park, mountain, overpass, palace, parking lot, railway, railway station, rectangular farmland, river, roundabout, runway, seaice, ship, snowberg, sparse residential, stadium, storage tank, tennis court, terrace, thermal power station, and wetland.

Please cite the following paper when publishing results that use this dataset fully or partly:

G. Cheng, J. Han, X. Lu. Remote Sensing Image Scene Classification: Benchmark and State of the Art. Proceedings of the IEEE.

This dataset can be downloaded from [OneDrive](https://1drv.ms/u/s!AmgKYzARB15ca3HNaH1zp_Ixjs) (https://1drv.ms/u/s!AmgKYzARB15ca3HNaH1zp_Ixjs) or [BaiduWangpan](http://pan.baidu.com/s/1mifR6tU) (<http://pan.baidu.com/s/1mifR6tU>) .

The following figure shows two samples of each class from this dataset.

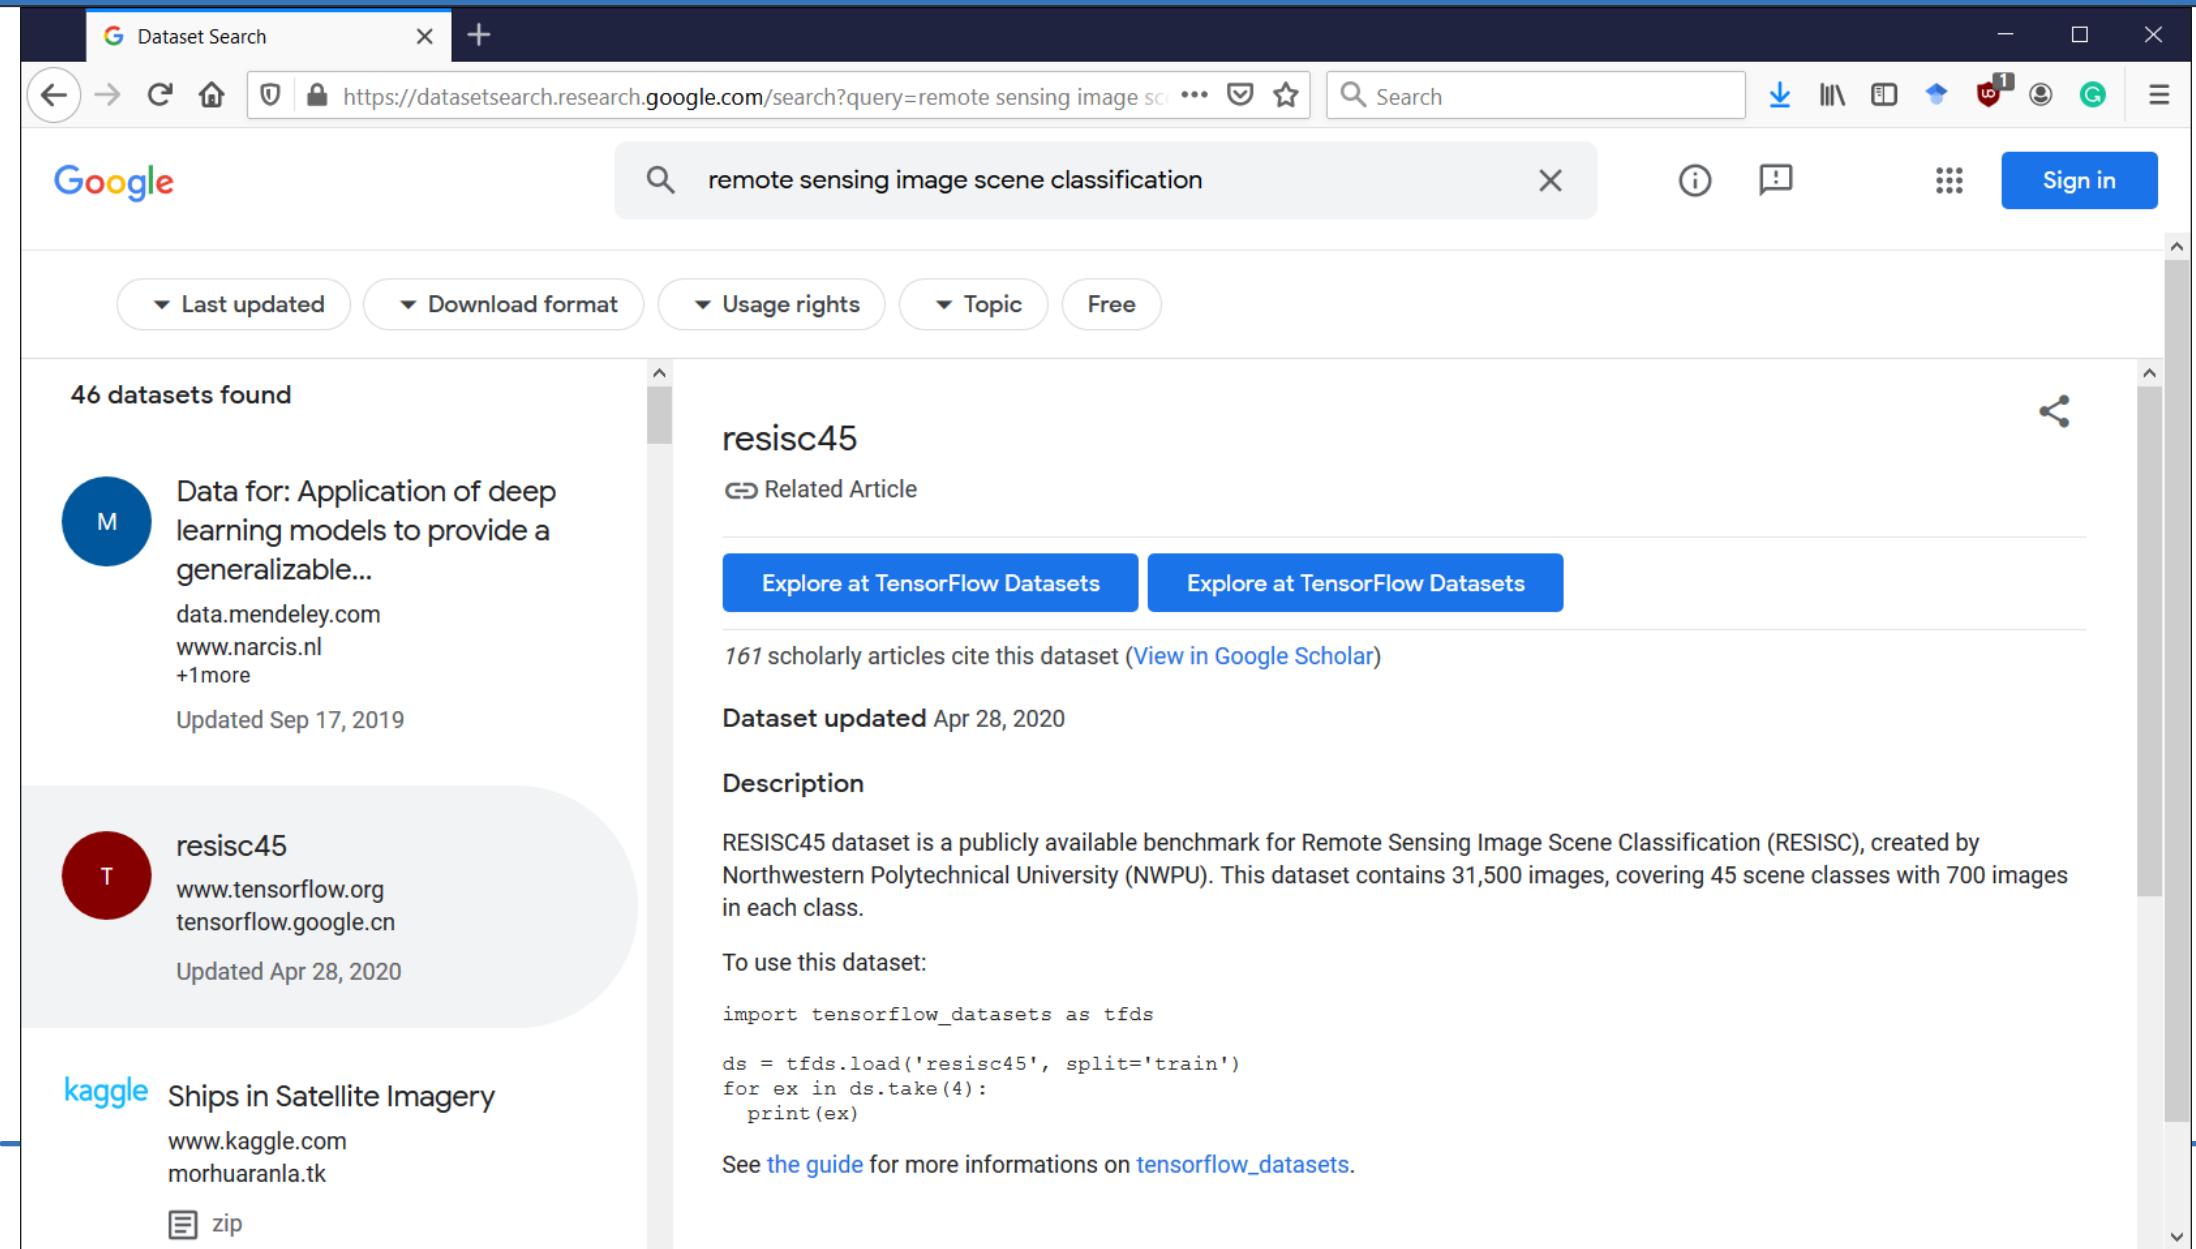

Scholars

Pitanja s kojima se susreće istraživač

- Da li postoji željeni skup podataka?
- Kako ga pronaći?
- Kojim alatima?
 - Postoji li mogućnost filtriranja po različitim kriterijumima da bi se pronašli odgovarajući podaci.
 - Postoje li metapodaci koji će omogućiti to filtriranje?
 - U kojem su formatu?
- Mogu li se pronađeni podaci preuzeti?
- U kojem formatu?
 - Mogu li se podaci tom formatu lako integrisati sa postojećim podacima?
 - Može li se ta integracija uraditi automatski – mašinska čitljivost?
- Da li se podaci smiju preuzeti?
- Pod kojim uslovima?
- Koga treba citirati?

- Da li da finansiramo prikupljanje podataka?
- Možemo li iskoristiti ranije prikupljene podatke za novu namjenu?
- Možemo li kombinovati ranije prikupljene podatke sa novim da bismo analizirali trendove i formirali politike?
- Mogu li građani iskoristiti podatke čije je prikupljanje finansirano javnim sredstvima?
- Kako da iskoristimo podatke za podsticanje razvoja kreativnog biznisa i ekonomije znanja?
- Kako stvoriti uslove za dugoročno čuvanje rezultata naučnih istraživanja?
- Kako da se borimo protiv prevara u nauci?

Google Dataset Search?

The screenshot shows a web browser window displaying the Google Dataset Search results for the query "remote sensing image scene classification". The search bar at the top contains the query. Below the search bar are several filter buttons: "Last updated", "Download format", "Usage rights", "Topic", and "Free". The main results section displays 46 datasets found. The first dataset listed is "resisc45", which has a blue circular icon with the letter "M" and a description: "Data for: Application of deep learning models to provide a generalizable...". It includes links to "data.mendeley.com" and "www.narcis.nl" and a note "+1more". The update date is "Updated Sep 17, 2019". The second dataset listed is "resisc45", which has a red circular icon with the letter "T" and a description: "resisc45" followed by "www.tensorflow.org" and "tensorflow.google.cn". The update date is "Updated Apr 28, 2020". The third dataset listed is "kaggle Ships in Satellite Imagery", which has a blue circular icon with the letter "k" and a description: "Ships in Satellite Imagery" followed by "www.kaggle.com" and "morhuanrla.tk". The update date is "zip". On the right side of the screen, there is a detailed view of the "resisc45" dataset. It shows the dataset name "resisc45" with a share icon, a "Related Article" link, and two blue "Explore at TensorFlow Datasets" buttons. It also states "161 scholarly articles cite this dataset" and provides a "View in Google Scholar" link. The dataset was last updated on "Apr 28, 2020". The "Description" section explains that the RESISC45 dataset is a publicly available benchmark for Remote Sensing Image Scene Classification (RESISC), created by Northwestern Polytechnical University (NWPU). It contains 31,500 images, covering 45 scene classes with 700 images in each class. The "To use this dataset:" section provides a code snippet for loading the dataset using TensorFlow Datasets:

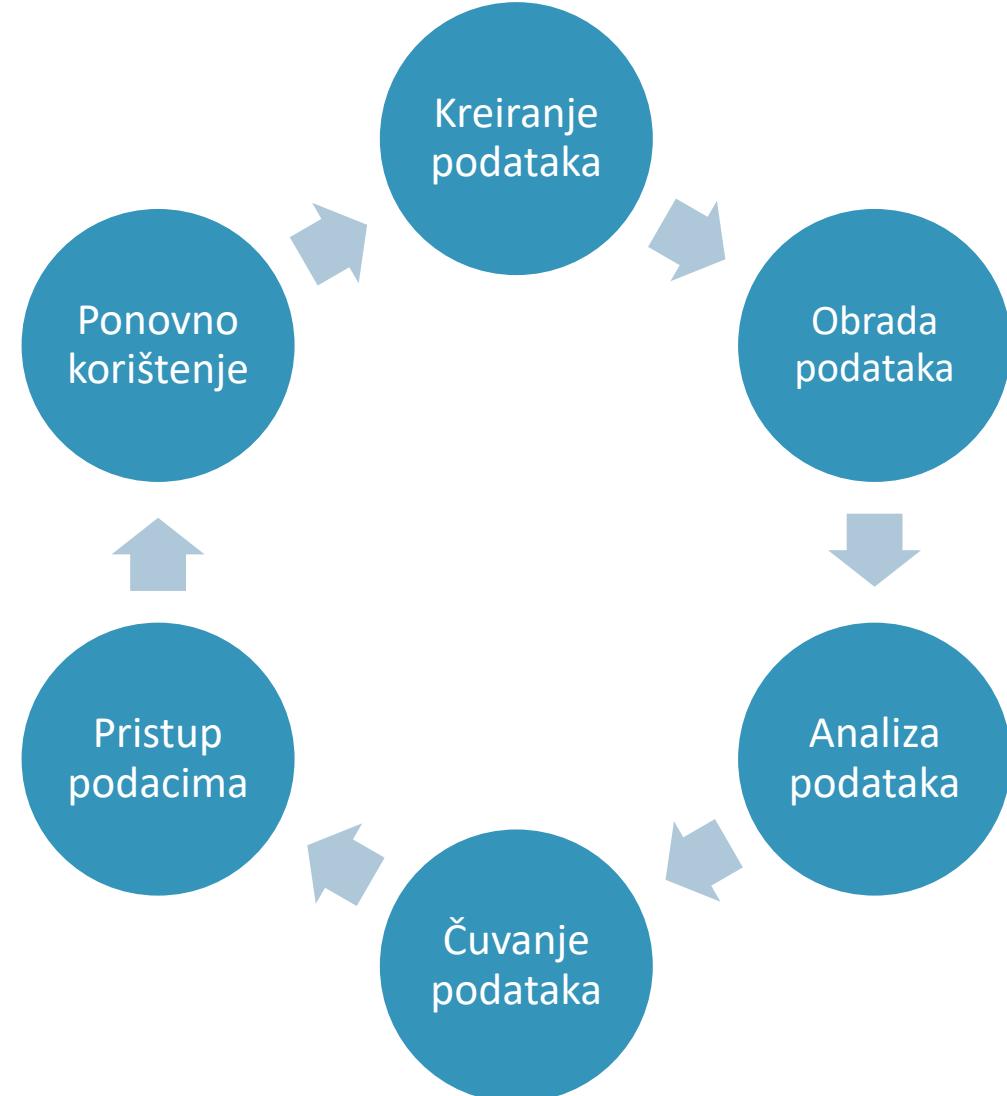

```
import tensorflow_datasets as tfds
ds = tfds.load('resisc45', split='train')
for ex in ds.take(4):
    print(ex)
```

See [the guide](#) for more informations on [tensorflow_datasets](#).

Kako obezbijediti lakši pristup
podacima za ljudе i mašine?

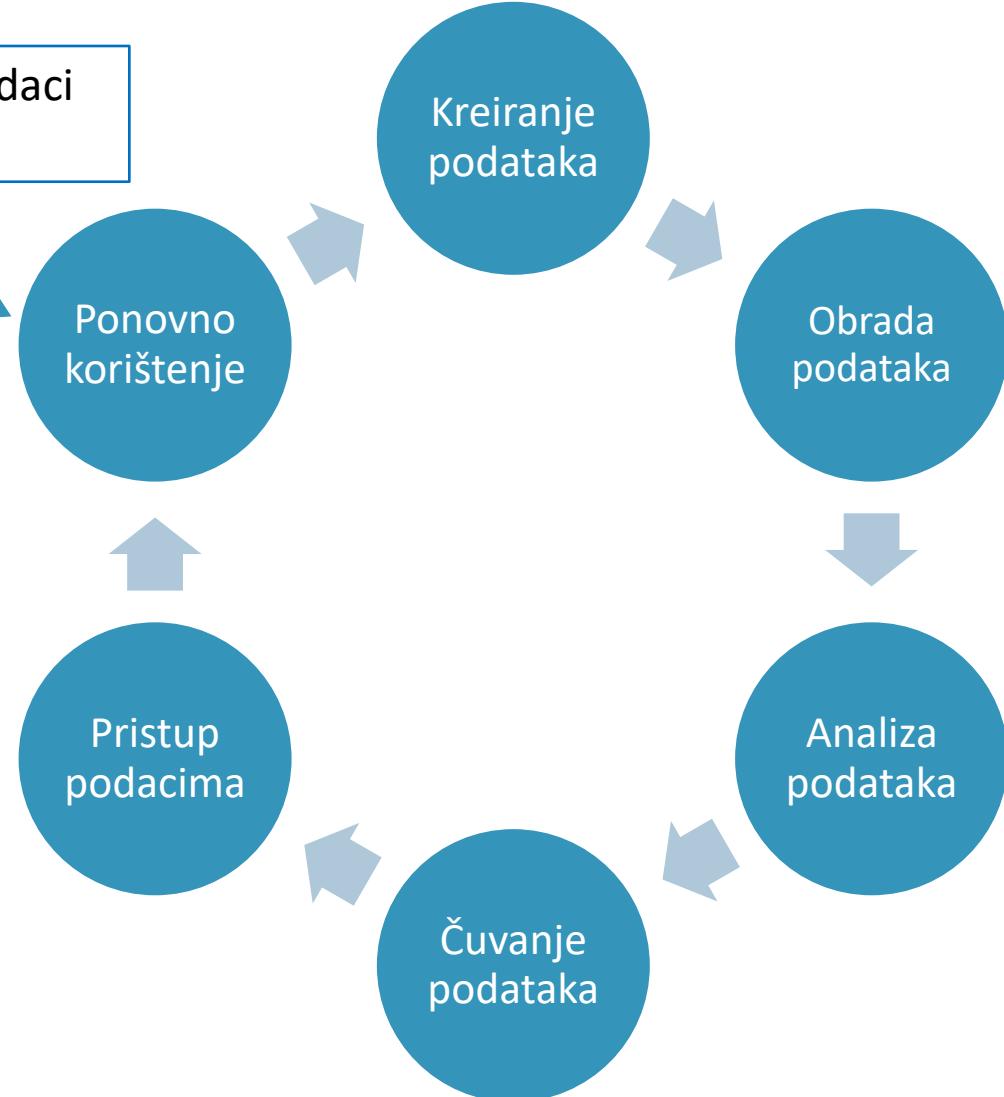

Životni ciklus podataka

Razmišljamo unazad

Kako želimo da budu organizovani podaci
da bismo ih mogli ponovo koristiti?

- ❑ Preporuka Komisije (EU) 2018/790 o pristupu i čuvanju naučnih informacija
 - ❑ (...) izrada plana za upravljanje podacima treba da postane standardna naučna praksa u ranoj fazi istraživačkog procesa, kada se podaci dobijaju i/ili prikupljaju, između ostalog i tako što će se zahtevati izrada plana za upravljanje podacima.

- Kako se rukuje istraživačkim podacima tokom i nakon kraja projekta?
- Kakvi podaci se prikupljaju, obrađuju i/ili generišu?
- Koja metodologija i standardi će se primjenjivati?
- Da li će podaci biti dostupni/otvoreni?
- Kako će se brinuti o podacima i kako će se čuvati (i nakon kraja projekta)?

- Ne mora da sadrži potpuno razrađen plan
- Trebalo bi da odgovori na neka pitanja:
 - Koji standardi će biti primjenjeni?
 - Kako će se podaci koristiti i/ili dijeliti/učiniti dostupnim u cilju verifikacije i ponovnog korištenja?
 - Ako se podaci ne mogu učiniti dostupnim, zašto?
 - Kako će se brinuti o podacima i kako će se čuvati?
 - Kakva je politika konzorcijuma u pogledu eksplotacija rezultata i intelektualnog vlasništva?

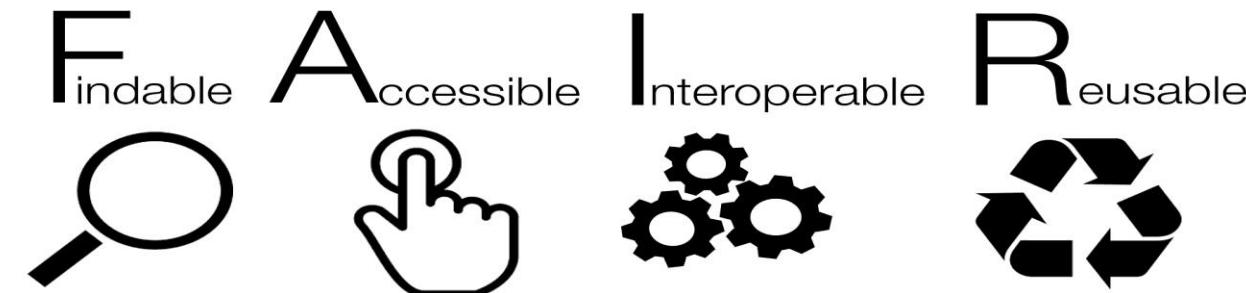

- ❑ Inicijalni plan u H2020 projektima treba da bude napravljen u šestom mjesecu realizacije
 - ❑ Obrazac plana: [Horizon 2020 FAIR Data Management Plan \(DMP\) template](#)
 - ❑ Nije neophodno dati detaljne odgovore na sva pitanja
- ❑ Plan je živi dokument
 - ❑ Ažuriranje u toku projekta kada se pojavi potreba
 - ❑ Sadrži broj verzije i tabelu izmjena
- ❑ Plan treba ažurirati kada se:
 - ❑ pojave novi podaci
 - ❑ promijeni politika konzorcijuma (npr. patenti)
 - ❑ promijeni sastav konzorcijuma
- ❑ Ažuriranje u skladu sa revizijama projekta
 - ❑ periodične
 - ❑ finalna

- ❑ U H2020 projektima su troškovi upravljanja i obezbjeđivanja otvorenog pristupa podacima prihvatljiva budžetska kategorija
 - ❑ Data Management Cost Guide

1. Data summary
2. FAIR data
 - a. Making data findable, including provisions for metadata
 - b. Making data openly accessible
 - c. Making data interoperable
 - d. Increase data re-use (through clarifying licences)
3. Allocation of resources
4. Data security
5. Ethical aspects
6. Other

FAIR podaci su:

- Findable** – omogućeno pronađenje (vidljivi)
- Accessible** – omogućen pristup (dostupni)
- Interoperable** – omogućena saradnja (interoperabilni)
- Reusable** – omogućeno ponovno korištenje (višekratni)
- Mjerljivi principi**
- Kontinuum usklađenosti**
- Ne radi se o standardu**

SangyaPundir / CC BY-SA (<https://creativecommons.org/licenses/by-sa/4.0>)

- ❑ Dodijeliti podacima globalno jedinstven i perzistentan identifikator
 - ❑ DOI, Orcid,...
- ❑ Detaljno opisati podatke metapodacima
 - ❑ DICOM,...
- ❑ Metapodaci jasno i eksplicitno sadrže identifikator podataka koje opisuju
 - ❑ Koristiti standardne šeme za metapodatke (npr. [Dublin Core](#))
 - ❑ Konsultovati [DCC metadata directory](#), [RDA Metadata Directory](#), [FAIRsharing](#),...
- ❑ (Meta)podaci su registrovani i indeksirani u pretraživom repozitorijumu
 - ❑ Koristiti repozitorijum koji dodjeljuje objektima perzistentne identifikatore (npr. [Zenodo](#))

Kako da podaci budu FAIR?

Accessible (Dostupni)

- ❑ Omogućiti pristup (meta)podacima na osnovu njihovog identifikatora korištenjem standardizovanog komunikacionog protokola
 - ❑ HTTP, FTP,...
 - ❑ Ne moraju biti otvoreni (otvoreni koliko je moguće, zatvoreni koliko je potrebno)
 - ❑ Može postojati period embarga
 - ❑ Ali da bi bili FAIR treba da budu vidljivi – omogućiti pristup metapodacima
 - ❑ Definisati način za dobijanje pristupa
 - ❑ Izabratи repozitorijum
 - ❑ [Zenodo](#), [Harvard Dataverse](#), [Dryad](#),...
 - ❑ [re3data.org](#) je registar repozitorijuma
- ❑ Obezbijediti pristup metapodacima i kada podaci više nisu dostupni

Kako da podaci budu FAIR? Interoperable (Interoperabilni)

- ❑ Koristiti otvorene formate i standarde za podatke i metapodatke
- ❑ Koristiti kontrolisane rječnike, ontologije, tezauruse karakteristične za domen
- ❑ Opisati veze sa drugim skupovima podataka
- ❑ Konsultovati DCC metadata directory, RDA Metadata Directory, FAIRsharing,...

Kako da podaci budu FAIR? Reusable (Višekratni)

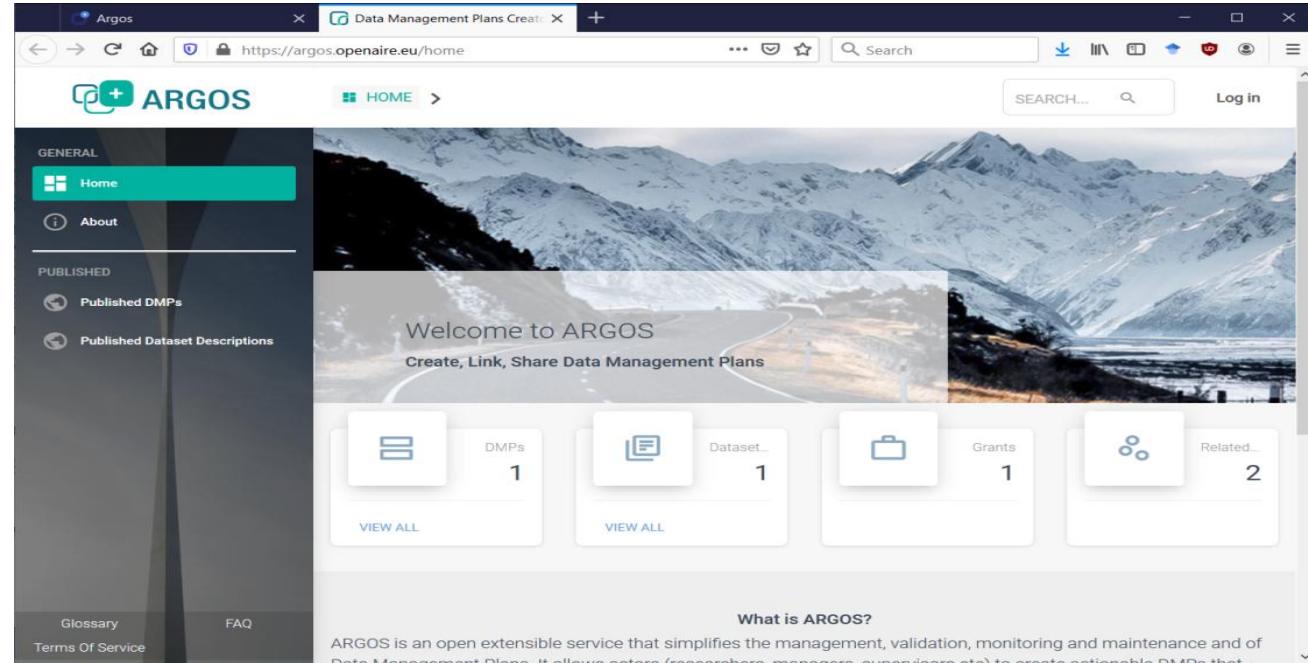

- ❑ Detaljno opisati (meta)podatke mnoštvom tačnih i relevantnih atributa
 - ❑ Dokumentovati podatke, npr. README fajl
 - ❑ Opis šta sadrže pojedini fajlovi
 - ❑ Definicije kolona ili redova u tabeli
 - ❑ Kako su podaci obrađeni?
 - ❑ Sa kojim drugim skupovima su podaci povezani?
 - ❑ Ko je kontakt osoba za podatke?
- ❑ Odrediti licencu pod kojom su podaci dostupni
 - ❑ MIT, Creative Commons,...

FAIR principi se ne primjenjuju samo na podatke

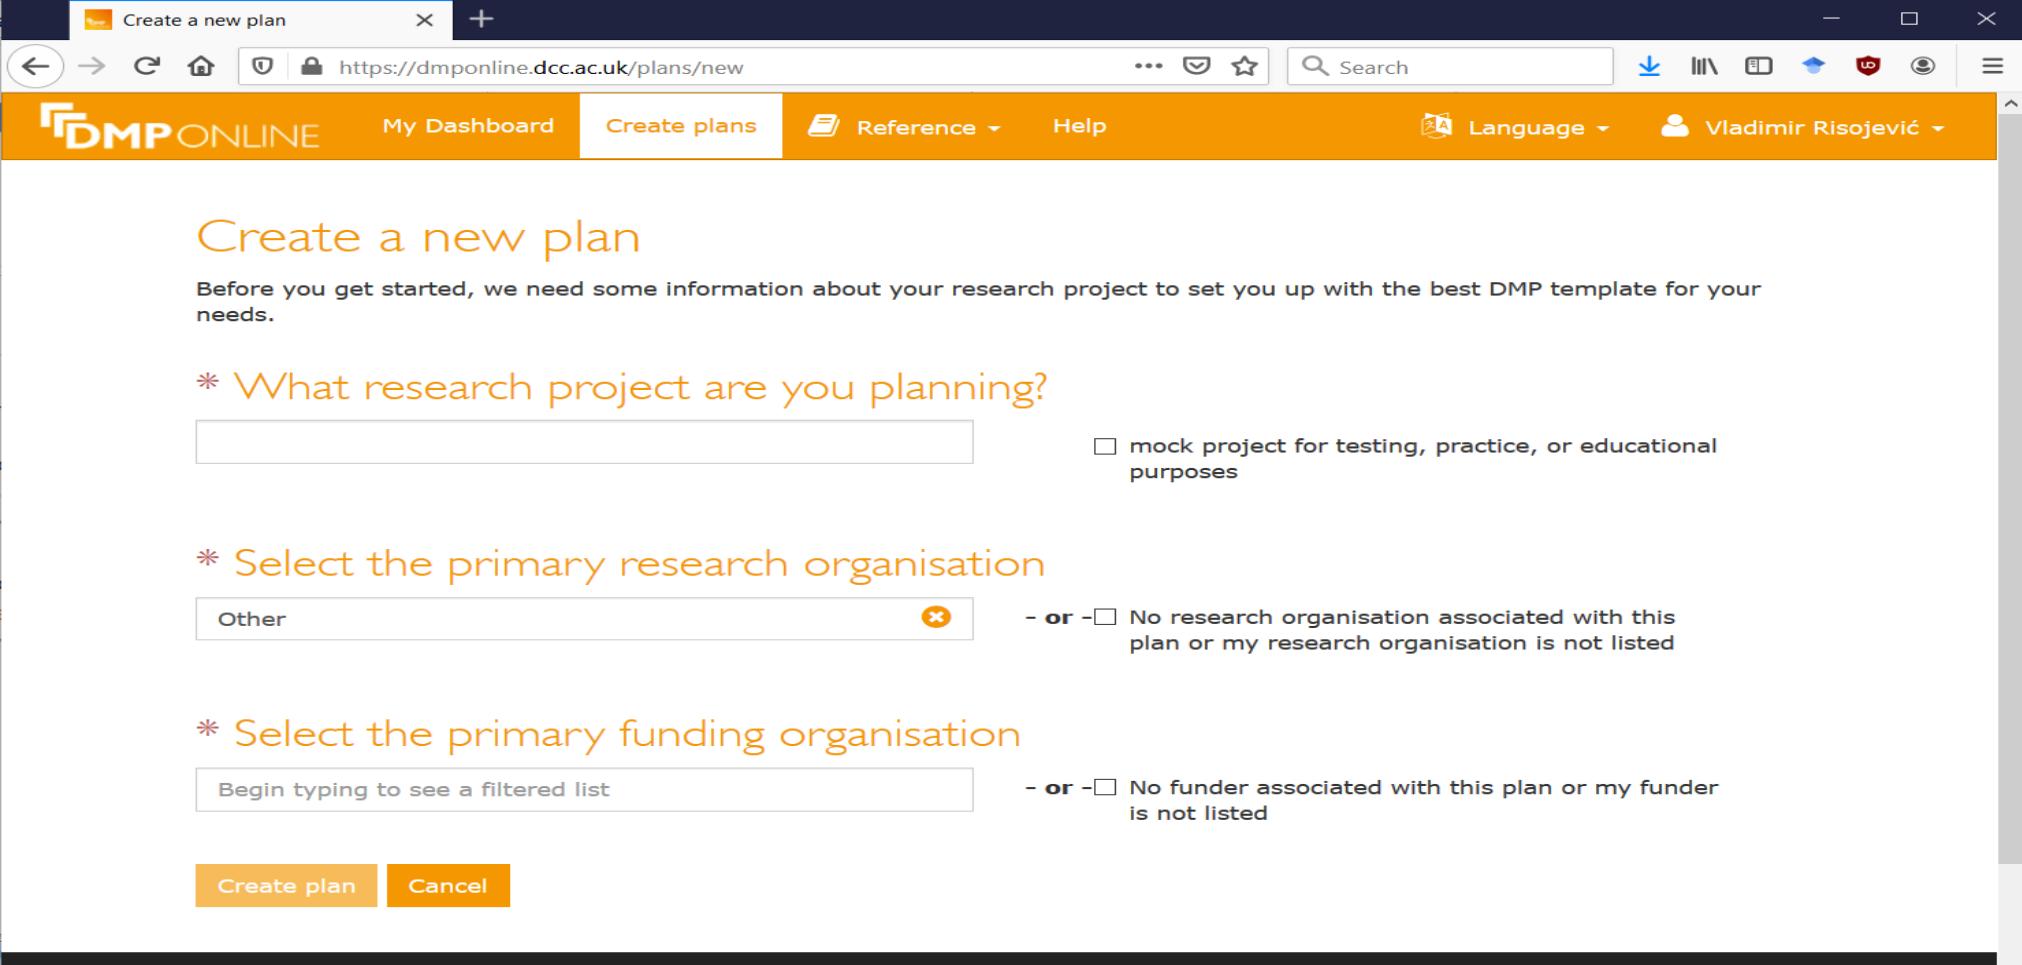

- ❑ Mogu se primijeniti na sve digitalne istraživačke objekte
 - ❑ rječnike,
 - ❑ algoritme,
 - ❑ alate,
 - ❑ radne tokove...
- ❑ Osigurava se transparentnost, ponovljivost i ponovno korištenje

- ❑ **ARGOS** (<https://argos.openaire.eu>)

- ❑ Onlajn alat za podršku automatizovanim procesima kreiranja, upravljanja, dijeljenja i povezivanja planova upravljanja podacima sa istraživačkim artifiktaima kojima odgovaraju

□ DMPonline, <https://dmponline.dcc.ac.uk>

The screenshot shows the 'Create a new plan' page on the DMPonline website. The page has a dark blue header with the title 'Create a new plan'. Below the header is a navigation bar with links for 'My Dashboard', 'Create plans' (which is highlighted in orange), 'Reference', 'Help', 'Language' (set to English), and a user profile for 'Vladimir Risojević'. The main content area has a light background. It starts with the heading 'Create a new plan' in orange. Below it is a text block: 'Before you get started, we need some information about your research project to set you up with the best DMP template for your needs.' There are three required fields marked with asterisks (*): 1. 'What research project are you planning?' - A text input field with a placeholder 'Project name or ID'. To its right is a checkbox for 'mock project for testing, practice, or educational purposes'. 2. 'Select the primary research organisation' - A dropdown menu showing 'Other' with an 'x' icon to clear it. To its right is a checkbox for 'No research organisation associated with this plan or my research organisation is not listed'. 3. 'Select the primary funding organisation' - A text input field with a placeholder 'Begin typing to see a filtered list'. To its right is a checkbox for 'No funder associated with this plan or my funder is not listed'. At the bottom of the form are two buttons: 'Create plan' (orange) and 'Cancel'.

Procjena koliko su podaci FAIR

- SATIFYD, <https://satifyd.dans.knaw.nl/>

The screenshot shows a web browser window titled "FAIR self-assessment tool". The address bar displays the URL <https://satifyd.dans.knaw.nl/>. The page header features the DANS logo and the text "Data Archiving and Networked Services". Below the header, the word "SATIFYD" is prominently displayed in blue. A sub-header reads "Self-Assessment Tool to Improve the FAIRness of Your Dataset". A welcome message explains the tool's purpose: "Welcome to SATIFYD: the DANS Self-Assessment Tool to Improve the FAIRness of Your Dataset. This tool will show you how FAIR (Findable, Accessible, Interoperable, Reusable) your dataset is and will provide you with tips to score (even) higher on FAIRness. Ideally, you use this tool prior to the deposit in EASY." It notes that the 12 questions touch upon the FAIR data principles but do not strictly follow them. The overall score is provided at the end of the page. Some questions are posed more than once because the topics are relevant in more than one letter. Links are provided for more information and e-mail support.

FINDABLE

1. Did you provide sufficient metadata (information) about your data for others to find, understand and reuse your data? [i](#)

2. Did you use standards such as controlled vocabularies, taxonomies (thesauri) or ontologies to describe your dataset? [i](#)

Controlled vocabularies
 Taxonomies (thesauri)
 Ontologies
 There are no standards for my discipline
